# 2021 Technology Fast 500 Rankings

**500**<sup>™</sup>  
Technology Fast 500  
2021 NORTH AMERICA

Technology Fast 500 provides a ranking of the fastest-growing technology, media, telecommunications, life sciences, and energy tech companies—both public and private—in North America. The Technology Fast 500 award winners for 2021 are selected based on percentage fiscal year revenue growth during the period from 2017 to 2020.

## In the company's own words

Cyberattacks targeting Active Directory, the identity system used in 90% of organizations worldwide, are on the upswing. Attackers take advantage of weak Active Directory configurations to identify attack paths, access privileged credentials, and deploy ransomware. To help organizations stay ahead of cybercriminals, Semperis recently announced its latest release of Directory Services Protector (DSP), which provides a complete picture of exposure in hybrid environments by monitoring for threats in both on-premises Active Directory and Azure Active Directory in one view. Earlier this year, Semperis also launched Purple Knight, its free Active Directory security assessment tool built to help organizations uncover risky configurations and other security vulnerabilities.

"Our designation in the Deloitte Fast 500 for the second year is testament to rapid adoption from the market, which was driven by our work on the front lines fighting back against the cybercrime wave that is flooding the world right now," said Mickey Bresman, CEO of Semperis. "For example, Semperis is helping multiple healthcare providers that have been hit by ransomware attacks and have lost control of their environments—with devastating effects on their ability to deliver patient care. We help those companies rebuild their infrastructures as fast as possible, regain control by removing the adversary, and close security gaps so they can trust their environment again."

## About Semperis

For security teams charged with defending hybrid and multi-cloud environments, Semperis ensures the integrity and availability of critical enterprise directory services at every step in the cyber kill chain and cuts recovery time by 90%. Purpose-built for securing hybrid Active Directory environments, Semperis' patented technology protects over 50 million identities from cyberattacks, data breaches, and operational errors. The world's leading organizations trust Semperis to spot directory vulnerabilities, intercept cyberattacks in progress, and quickly recover from ransomware and other data integrity emergencies. Semperis is headquartered in Hoboken, New Jersey, and operates internationally, with its research and development team distributed between San Francisco and Tel Aviv.

Semperis hosts the award-winning Hybrid Identity Protection conference and podcast series ([www.hipconf.com](http://www.hipconf.com)) and built the free Active Directory security assessment tool, Purple Knight ([www.purple-knight.com](http://www.purple-knight.com)). The company has received the highest level of industry accolades, most recently ranking among the top three fastest-growing cybersecurity companies on the 2021 Inc. 5000 list. Semperis is accredited by Microsoft and recognized by Gartner.
