

Chaos → order: Take control during a cyber crisis.

Crisis management is complex. Incident response is downright messy. With the stakes so high, don't let chaos rule.

READY1: BUILT TO ELIMINATE UNCERTAINTY

Gain the advantage during a cyber crisis.

One platform to prepare & respond

Strength in unity builds resilience. Ready1 acts as your command center for crisis response, enabling precise communication and coordination when it matters most.

Ready your people

Define and streamline skill-based roles, responsibilities, and expectations for cross-functional teams and external vendors—creating an optimized crisis and incident response (IR) structure.

Ready your process

Operationalize proven crisis and IR frameworks, enhanced with expert playbooks. From preparation to after-action review, access a complete library to respond effectively.

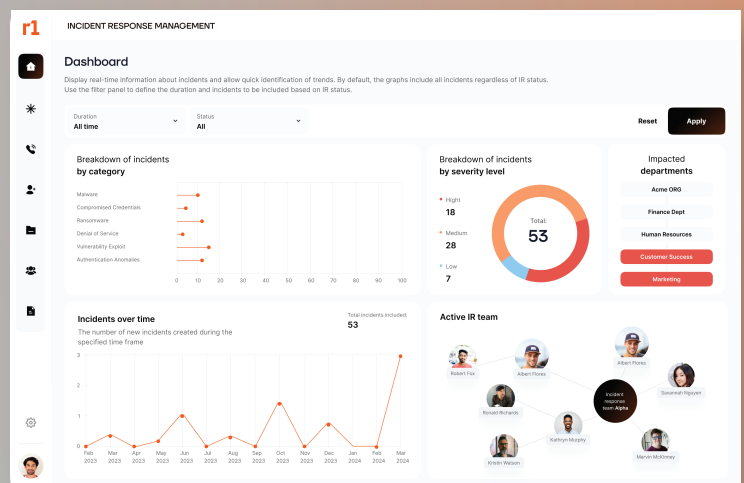

Ready your tech

Consolidate fragmented crisis management, IR, downtime planning, and communication tools into a single, secure, intuitive platform—designed to work even when everything else fails.

INTRODUCING THE READY1 PLATFORM

Shift from reactive to resilient.

Ready1 unifies stakeholders, coordinators, and technical teams under one secure platform, ensuring seamless crisis response through preparation, collaboration, and enterprise-wide communications.

-  **Ready1 Status:** Gain full visibility into enterprise resiliency. Flexible dashboards display real-time summaries of active incidents and key performance metrics—empowering informed decisions and continuous improvement.
-  **Ready1 Notify:** Beyond a basic call bridge, Ready1's purpose-built crisis communication system automates alerts with impact mapping, secure mobile notifications, incident-based chat, and instant third-party IR activation.
-  **Ready1 Incidents:** Track, manage, and resolve incidents with precision. Role-specific views provide real-time visibility into responders, affected systems, end users, and business operations—ensuring coordinated action.
-  **Ready1 Phonebook:** Centralize contact management for critical stakeholders and external partners. Verify all internal and external personnel to prevent information leaks, while ensuring the right channels are informed.
-  **Ready1 Scribe:** Log and audit every detail of an incident in real time and get a complete picture of who is working on what. From task assignments to post-incident analysis, Ready1 Scribe ensures accuracy, visibility, and forensic-ready documentation.
-  **Ready1 Composer:** Build and manage response teams based on skills, availability, and incident severity. Scale teams up or down and integrate third-party partners for a flexible, effective response.
-  **Ready1 Docs:** Store, manage, and control access to critical documents with a secure knowledge hub. Ready1 Docs ensures up-to-date, confidential documentation is available exactly when you need it—even during downtime.

"Ready1 is a game-changing, all-in-one solution that enables teams to rapidly respond, assess, contain, and remediate threats—even when traditional infrastructure fails—because in a crisis, minutes cost millions."
